

## **TROTTA WIGS: Care and Maintenance**

### **How To Wear A Wig**

- Make sure your hair is gathered in a tight bun below your nape;
- Hold the opposite sides (side burns) of your wig between your fingertips;
- Slip on your wig starting from the front end;
- Position the wig until your hairline is aligned with the wig's hairline;
- Using the velcro closure inside the cap you can adjust the circumference for a more comfortable fit;
- To restore volume and to comb the wig, use a pick comb or your fingertips to adjust the wig to your liking;
- After each use shake the wig before returning it to its stand

### **Wig Care & Handling**

With proper care and handling your Trotta wig in time will always look new.

- Fill a container with cold water and add a small quantity of neutral/baby shampoo;
- Immerse the wig, shake it gently in the water and then let it soak for 5 minutes;
- Rinse with the cold water (DO NOT wring it dry) and dab with a towel to remove excess water;
- Place the wig back on its base and let it dry naturally;
- DO NOT use a hairdryer or curler or hot plate;
- DO NOT use bleach, hair dye, hair lacquer or cachet;
- NEVER expose the wig to heat sources;
- ONLY comb the wig when completely dry.
